

Answering The Green Call

SCA
Don Lewis - President

At SCA Tissue, we take pride in listening to our customers. And what we've been hearing lately is a resounding interest in products that are environmentally friendly. At SCA Tissue being green is much more than just a catchphrase. It's the way we have manufactured our products and conducted our business for years. We want to help you achieve a more sustainable work environment.

Sustainability is a value that directs our corporate behavior and serves as a benchmark for measuring our actions. A sustainable building provides a healthful and productive indoor environment. It's built with materials that won't deplete our environment, contribute to the waste stream or require too-frequent replacement. And it's maintained by equipment and products that meet those same criteria.

Did you know that SCA Tissue manufactures our Tork tissue, towels, and napkins from 100% recycled materials which saves not only landfill space, but water and energy as well? In fact, SCA will provide you with an Environmental Calculator to show you the positive environmental impact your Tork products will have versus those manufactured from other pulp sources.

Tork also offers innovative dispensing systems that reduce usage so there is less product waste. Our regional manufacturing facilities and state-of-the-art logistics practices mean that our products travel less time and use less fuel. And our chlorine-free manufacturing processes ensure there are no harmful dioxins released in the air and water. What does all this mean to you?

When you choose SCA Tissue, you are making a strong environmental statement. It shows that you are aware of environmental issues and are choosing products that minimize your environmental impact. As an added benefit, Tork products and dispensers can help your business earn points toward LEED certification, reduce waste and

control consumption.

Here are just some of the accolades and honors we've received:

- Earned an Energy Efficiency Recognition Award from the U.S. Department of Energy for our Menasha, WI facility
- Received the Pollution Prevention Achievement Award by the Alabama Department of Environmental Management in 2004 for our Barton, AL, facility
- Our Flagstaff, Arizona facility has

won the Governor's Prize for Water Management and a National Water Re-Use Award.

- SCA headquarters office in Philadelphia, PA is LEED-CI Gold certified
- SCA is the highest rated paper company by the World Wildlife Fund for the past three years
- Recognized as one of the 100 most sustainable companies in 2005, 2006 and 2007
- SCA is a global leader of FSC-certified products
- SCA is a U.S. Green Building Council Member
- SCA is a member of the Healthy Schools Campaign

We can help your business be greener. To learn how, contact us at www.torkusa.com.

Regards,

Don Lewis
President

SCA - named as the second greenest company in the world by The Independent in conjunction with Ethical Investment Research Services.
